Ayushi Singh

VARANASI, INDIA
(open to internships)

Second-year engineering student with a strong interest in technology, programming, and software development. Eager to learn new skills and apply theoretical knowledge to real-world projects. Passionate about problem-solving, AI, and emerging technologies, with a focus on building practical and impactful solutions.

EDUCATION

Bachelor of Technology – Computer Science and Engineering

Lovely Professional University, Punjab

July 2025 – Expected May 2029

CGPA: 8.3/10.0

PUBLICATIONS AND PROJECTS

1. **Zenora– AI Powered Academic & Career Platform**

Tech: React.js, Firebase Authentication, Firestore Database, Gemini API, JavaScript, HTML/CSS, Netlify

Link: https://zenoraastudy.netlify.app/

- Developed an AI-powered platform designed to help students with academics, career guidance, and skill development.
- Implemented AI-based academic assistance, career roadmap generation, and smart student support features using Gemini API.
- Built responsive frontend interfaces with React.js and integrated Firebase for authentication and database management.
- Deployed the project online using Netlify for real-time accessibility and testing. Still working on this project....

2. **GramSetu – AI-Powered Farmer-to-Market Platform**

Tech: React.js, Vite, Node.js, Express.js, MongoDB Atlas, OpenAI API, REST APIs, JWT Authentication, Tailwind CSS, Netlify & Render.

Link: https://grramsetuu.netlify.app/

- Developed a full-stack agricultural platform using React.js, Node.js, Express.js and MongoDB, integrating JWT authentication, REST APIs, real-time data and interactive maps for farmer–buyer workflows.
- Integrated AI-powered recommendations and demand–supply analysis to provide market insights, personalized selling recommendations, and data-driven procurement decisions.
- Designed and deployed the responsive application with Tailwind CSS, MongoDB Atlas, Netlify and Render, integrating frontend, backend, database and AI services into a production-ready workflow.

PARTICIPATIONS

- Secured 3rd position in a 24-hour inter-college hackathon among nearly 100 participating teams
- Achieved a top 7 position in a Web Development Hackathon competing against senior students and experienced teams.
- Worked on real-world project development, UI design, and team collaboration during hackathons.

FUTURE AMBITIONS AND GOALS

I aspire to build a career in AI/ML and software development, continuously strengthening my technical and problem-solving skills while contributing to innovative real-world solutions. In the long term, I aim to pursue an MBA to develop strong managerial and strategic skills and grow into leadership roles.

About me

AI/ML Engineer turning complex data into intelligent, scalable solutions through machine learning, efficient problem-solving, web, and app development.

Key Skills

Machine Learning
Pandas | NumPy | Matplotlib | Seaborn | Python
Programming
Java | DSA(Java)basic – in progress | SQL
Web Development
HTML5, CSS3, JavaScript (ES6+) | React.js | Node.js | Firebase | Hue.js | Typescript | Tailwind and others
Cloud and Tools
Git, GitHub | Jupyter Notebook, Google Colab | VS Code

Hobbies

- Chess
- Travelling
- Badminton
- Exploring new technologies
- Problem solving

Languages

English

Hindi

Spanish

Certifications

- Microsoft — Manage Secrets in Java Applications: Zero Trust and Zero Secrets
- HACK AI – Season 2 — 24-hour AI Hackathon
- Code-A-Thon — 24-hour Hackathon
